We specialise in "bespoke" units made to your individual requirements in our own workshop.
The base is down to **you** . It needs to be **solid** and **level**. If found to be unsuitable we will only drop off your shed

PRICES PRINTED May 2022
ALL SIZES ARE APPROXIMATE

Barn sheds come with a floor and roof that is made using tongue & groove matchboard. This is 12mm thick and comes with a planed finish. Boards join together creating a stronger floor and roof.

The walls are either made using shiplap that is 12mm thick (shiplap is tongue and groove) or Log lap which is 19mm thick to its widest part.(again tongue and grooved together)
The framing we use is 45mmx35mm with rounded edges.

Log lap will create a stronger shed as it is thicker timber!
